3	Yes	DVS	2003	1961	3	2	Conc Tile	W Board	Newlands	V_H	Within 1 week was noticeably doing what we needed it to do, reduce condensation (infact 95% got rid of it completely) and completely got rid of musty smell and mold build up.

5	Yes	SAYR	2007	1962	3	5	Iron	W Board	Auckland	V_H	With DVS still had mould in wardrobes. Added extra insulation in ceiling and installed heat transfer unit that had outlets in wardrobes and problem solved. House now has Kent fire, heatpump, DVS and heat transfer unit. All DVS seems to do is help in keeping condensation off windows

10	Yes	HRV	2008	2006	4	7	Conc Tile	W Board	Howick	V_H	HRV salesmen have been extremely pushy over winter and are trying to sell a filter replacement with a threat of nullifying warranty if aftermarket filters are used. They do not let you replace parts or sell them to you but insist on their technicians doing it. They have recently gone very quiet and I suspect that complaints have been made against them and upheld by commerce commission or similar. Would never buy again.
